Subject: Flint Hills North Pole Refinery question

Hi Elizabeth:

I left you a voice message this week but wanted to follow up. I was hoping we could talk before the Thanksgiving holiday, if possible (I'm gone for 10 days after that.) There are a couple of CERCLA questions I would like to discuss—most importantly, what would be the challenges (if any) of proving sulfolane is a hazardous substance under CERCLA. I've done some research but it would be really helpful if you could walk me through it.

We may decide we would like to use CERCLA for enforcement purposes, along with state law, and that is why I am asking.

Could you email me if there is a time that works for you to talk with me next week, or my direct number is 907 269 5285.

Thanks much.
